Outputting images

Preparing finished images

Images for Web use

Images for print use

Outputting images

Appendix

ACE exam objectives map

Comprehensive exam objectives

After completing the course

students will know how to:

\* Identify the attributes of raster and vector graphics, customize the Photoshop environment, open and navigate within images in Photoshop and Adobe Bridge, and use Photoshop Help.

\* Use several selection tools to select image areas, and modify and manipulate selections.

\* Create layers; arrange and transform layers; create Type layers; and use opacity, layer

blending modes, and layer styles to apply effects to layer contents.

\* Switch among Photoshop's image modes, adjust an image's hue and saturation, and use the Levels command to adjust image contrast.

\* Repair image defects, paint in an image, erase complex background areas, and apply filters to a layer or selection.

\* Determine an image's resolution and dimensions, resize images with and without resampling, and use the Crop tool and the Canvas Size command to change an image's canvas size.

\* Use the Save for Web & Devices command to save a copy of an image optimized for Web use; use the Save As command to save a copy of an image in a format for print use; and print single and multiple images on a page or export them to a PDF file intended for printing.
